Deploy Live Linux on Stick

The non destructive way

Marcus Schäfer

Our live ISO's rocks

- Usable as iso image for CD/DVD
- Usable as disk image for USB Sticks
- BIOS supported
- UEFI supported

All in one image But...

There is a disadvantage

dd if=image.iso of=/dev/stick

- Destroys all data on the stick

And an alternative

nodd image.iso /dev/stick

- Copies image.iso as file
- Create a cowfile instead of a write partition
- Uses grub2 in loopback mode to boot

TODO

- Allow options to specify e.g cowfile size or theme
- Choose a better name for the tool:)
- Maybe rewrite everything in another language, e.g Qt to allow a version for Windows
- Support EFI boot, would require GPT on the stick
- ...
